PROFILE

AI & XR Software Engineer with 2+ years of professional experience architecting interactive applications, optimizing real-time systems, and bridging the gap between Spatial Computing (Unity3D, XR Foundation, Oculus API) and Advanced Artificial Intelligence. Expert in deploying multimodal Generative AI, agentic gameplay workflows, and computer vision pipelines to engineer low-latency, immersive digital worlds and intelligent virtual agents.

EDUCATION

University Of Bremen

Masters of Science in Artificial Intelligence and Intelligent Systems

Bremen, Germany

1.2 German Grade

National University of Computer and Emerging Sciences

Bachelor of Science in Computer Science CGPA:3.81 / 4.00

Karachi, Pakistan

1.2 German Grade

EXPERIENCE

Extended Reality (XR) and AI Developer

BearingPoint GmbH

Dec 2024 – Present

Hamburg, Germany

- Architected an AI-driven Virtual Assistant in Unity with RAG pipeline to surface safety compliance insights in <500ms latency, enabling field teams to access real-time regulatory guidance without context-switching.
- Implemented state-of-the-art Speech-to-Text (STT) and Text-to-Speech (TTS) models, optimizing inference latency to ensure seamless, low-latency audio interactions in an immersive XR environment.

Game Developer

Pixel Dream Studios

Aug 2024 – Nov 2024

Karachi, Pakistan

- Implemented the Strategy Pattern in Unity to decouple and extend the game's core ability system, enabling seamless integration of diverse player powers like dashing, warping, and blasting on a shipped Steam title.
- Engineered state-driven AI behaviors for 1v1 and 1v4 single-player challenges, ensuring fast paced matches.
- Link:** store.steampowered.com/app/3630900/Snatch/

AI Developer

Syslab.Ai

Jun 2023 – Aug 2023

Karachi, Pakistan

- Developed a scalable, production-ready Movie Recommendation System using a hybrid recommendation model, boosting Precision@10 and Recall@10 by 80% through hyperparameter tuning.
- Containerized and orchestrated the microservices architecture using Docker and Kubernetes, ensuring high availability and seamless horizontal scaling for real-time inference workloads.

PROJECTS

Call Of Objects | 2D Game, Unity, Game Jam

- Individually designed, programmed, and published a 2D retro-styled platformer using C# and Unity, engineering responsive physics and modular mechanics.
- Authored clean, production-ready code adhering to strict object-oriented design patterns, maintaining detailed technical documentation for cross-platform deployment (Windows & Android)
- Link:** mohsinalimirxa.wixsite.com/experience/callofobjects

Mona Lisa AR | Unity, Spatial AI, Augmented Reality, Generative AI

- Created an interactive Augmented Reality (AR) mobile application using AR Foundation to project and analyze classic artwork in 3D physical spaces
- Integrated a GenAI conversational audio pipeline to act as a dynamic digital tour guide, providing real-time contextual information based on player proximity.
- Link:** mohsinalimirxa.wixsite.com/experience/monalisa

Soft Ball Shooter | *Unity, VR, Oculus*

- Developed an immersive Virtual Reality (VR) shooter game for Oculus hardware, optimizing spatial layout, physics interactions, and weapon handling mechanics.
- Utilized SOLID design principles to architect a decoupled, clean codebase, making the shooting mechanics, weapon inventory, and input handling highly modular and easily extendable.
- **Link:** mohsinalimirxa.wixsite.com/experience/softballshooter

The Last Of Us Inspired Cinematic | *Unreal Engine 5*

- Designed and composed a high-fidelity cinematic environment in Unreal Engine 5, utilizing advanced Lumen global illumination and custom lighting setups to capture a gritty, post-apocalyptic art direction.
- Engineered dynamic environmental visual effects using the Niagara Particle System and integrated skeletal character animations to build a compelling narrative sequence.
- **Link:** artstation.com/artwork/JvvEoz

Garbage Collector Hyper Casual Game | *Unity, Mobile, Game Jam*

- Developed and deployed a 3D hyper-casual mobile game built in Unity for a nationwide, month-long competitive Game Jam featuring over 120+ teams.
- Engineered an engaging "idle stacking" core gameplay mechanic alongside two distinct, object-oriented brain-teaser puzzles designed to scale in player difficulty.

TECHNICAL SKILLS

Technical Skills: C, C++, C #, Python, MLOPS, SQL (Postgres), MonogoDB(NoSQL), HTML/CSS

Frameworks: PyTorch, Tensorflow, LangChain, FastAPI

GameEngines and Tools: Unity3D, Unreal Engine 5, Blender

Robotics: ROS2, ISAAC Sim

Augmented and Virtual Reality Frameworks: AR Foundation, Vuforia, Oculus, OpenXR

Developer Tools: Git, Gitlab, Docker, Kafka, Grafana, Nginx, AWS, Azure, RESTful APIs, Microservices, CI/CD Pipelines

AWARDS

Participation Agentic AI Hackathon — BMW	Mar 2026
Winner AI Toolbox Hackathon — U Bremen Alliance	Dec 2025
Participation KI Hackathon — Digital University Hub	Sep 2024
Gold Medalist x2 — FAST Bachelors	Jun 2024
Winner Data Science — DevDay FAST	Apr 2024
Winner Game Jam — Procom	Apr 2022

CERTIFICATIONS

AWS Cloud Technical Essentials — Amazon	Oct 2023
Introduction to TensorFlow for AI, ML, and Deep Learning — DeepLearning.AI	Oct 2023
Introduction To Machine Learning In Production — Deeplearning.AI	Sep 2023
Generative Ai — Google	Aug 2023
Software Engineering Virtual Experience — EA, Virtual Experience	Aug 2023
